

# CNC PROGRAMMER/OPERATOR

**Company:** Stellar Space Industries (SSI) **Location:** NL Space Campus, Noordwijk, Netherlands | **Work Arrangement:** On-Site **Working Hours:** 40 hours per week

## JOB DESCRIPTION

Are you interested in joining a rapidly growing company in the space industry? Do you have a passion for technical innovation and a commitment to high-quality production? At Stellar Space Industries, we are entering an exciting phase of scaling up our production to meet the increasing demand for our advanced solutions.

We are seeking a **CNC Programmer/Operator** who will deliver exceptional technical craftsmanship and help optimize our production processes. You will collaborate closely with technicians, engineers, and researchers to elevate our products to new heights. This is your opportunity to be part of a scale-up working on groundbreaking technologies in the space, aviation, and high-tech sectors.

## KEY RESPONSIBILITIES

As a **CNC Programmer/Operator**, you will support the growth of our production capacity by:

- Designing, prototyping and manufacturing precision parts and scientific instruments.
- Actively contributing to the scale-up and optimization of our production processes.
- Programming and operating CNC-machines (including 5-axis CNC machines) for high-quality output.
- Collaborate with multidisciplinary teams to develop and implement innovative solutions.
- Manage, maintain and contribute to expansions of our technical capacity of workshop equipment.
- Perform quality control to ensure that all products meet the high standards of the space sector.

## YOUR PROFILE

You are a driven professional with:

- Education: MBO level 3/4 as a **CNC Programmer/Operator** or comparable technical education.
- Experience: Preferably experience with fusion360, 5-axis simultaneous CNC machining and Siemens programming.

## Skills

- An innovative and problem-solving mindset.
- The ability to work independently but also function effectively in a team.
- Strong organizational skills to support processes in a scaling production environment.
- Communication skills in Dutch and English.
- Passion: Interest in technological innovation and the ambition to grow within a rapidly changing work environment.

## WHAT WE OFFER

Working at Stellar Space Industries means being part of an exciting journey. We offer:

- A fast-growing, innovative work environment on the NL Space Campus in Noordwijk, at the heart of the Dutch space sector.
- A direct impact on the growth and scaling of our production processes.
- A competitive salary (based on full-time employment), depending on age, education and experience.
- An initial fixed-term contract with the possibility of a permanent contract after proven performance.

## Why work at Stellar Space Industries?

At SSI, you will join a dynamic scale-up where innovation, collaboration, and growth are key. Our team of skilled experts tackles complex technical challenges, creating technology that shapes the future of space.

**Our Values**

- **Scaling with Impact** Together, we create a production process that fosters the growth of Stellar Space Industries.
- **Innovation:** We strive to push boundaries in technology and processes.
- **Flexibility:** We adapt quickly and develop creative solutions in a dynamic environment.

If you wish to help a company's growth in the high-tech sector and directly contribute to scaling its production processes, Stellar Space Industries is the perfect place for you.
